Social Media Policy

CONTEXT STATEMENT

Social media is an interactive digital platform for learning and communicating within and between communities and individuals. An online community enables a group of digital users with a shared interest to create, share or consume online content. Social media allows for local and global connections that are immediate, generally open to all and easy to use.

Building a learning community includes being open to new learning, new ways of working and communicating and creating positive learning experiences. Catholic school communities model, teach and learn together in the digital space informed by their commitment to the dignity and worth of each person while building respectful relationships in real time and online.

The goal for school communities in using social media is to enhance learning and communications connections, leave a positive digital footprint, represent their schools well, communicate responsibly and safely, and show respect for others.
